

WAM - Feature #20

CAS integration

10/19/2015 04:59 PM - Colin Turner

Status:	Closed	Start date:	10/19/2015
Priority:	Normal	Due date:	
Assignee:	Colin Turner	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.0.0	Spent time:	5.00 hours
Description			
It should be possible to log in via CAS.			

History

- % Done changed from 0 to 50

Some time has been spent on this with the result that CAS logins to the site have worked, however there are problems with CAS logins to the admin site.

It is perhaps not clear if django requires Apache to force the CAS authentication or where it can do so by itself.

Please see:

<https://github.com/kstateome/django-cas>

for further info.

#2 - 10/19/2015 05:56 PM - Colin Turner

It turns out the easier way by far to do this is using django remote user support (which I didn't know about) <https://docs.djangoproject.com/en/1.8/howto/auth-remote-user/> and simply forcing CAS via Apache.
